NETWORK OF CORRUPTION:  
the CENTER FOR DISEASE CONTROL, the WORLD HEALTH ORG and BIGPHARMA

Unfortunately it is very profitable for the drug industry to get the medical profession to promote vaccines to the general population. Drug companies are corporations and they do not have a duty to "do no harm". Their only duty is to make money and "mitigate" any liability the company might be forced to deal with in a court of law. It is important the public doesn't forget this as it is very unlikely your physician or anyone who works for public health will remind you of this reality.

Here are the major signs of government and/or medical industry corruption:

1. Fraud and/or Misrepresentation
2. Conflict of interest
3. Bribery
4. Lack of transparency (concealment or deception)
5. Manipulated (or omitted) scientific studies
6. Propaganda ('spinning' the facts to conceal the truth) disseminated by the corporate mainstream media!!

Central Figure in CDC Vaccine Cover-Up Absconds With $2M
Robert Kennedy Jr, Huffington Post  
March 11, 2010

A central figure behind the Center for Disease Control's (CDC) claims disputing the link between vaccines and autism and other neurological disorders has disappeared after officials discovered massive fraud involving the theft of millions in taxpayer dollars. Danish police are investigating Dr. Poul Thorsen, who has vanished along with almost $2 million that he had supposedly spent on research.

Thorsen was a leading member of a Danish research group that wrote several key studies supporting CDC's claims that the MMR vaccine and mercury-laden vaccines were safe for children.

Drug firms 'drove swine flu pandemic warning to recoup £billions spent on research'
MailOnline  
January 18, 2010

Drug companies manipulated the World Health Organisation into downgrading its definition of a pandemic so they could cash in on a swine flu outbreak, it is claimed.

Critics said the decision was driven by pharmaceutical companies desperate to recoup the billions of pounds they had invested in researching and developing pandemic vaccines after the bird flu scares in 2006 and 2007.

PharmaMedia to Squelch EU Council's Secret Investigation into H1N1 Vaccine Fraud  
by Sherri Kane, Rense.com  
January 23, 2010

The Parliamentary Assembly of the Council of Europe (PACE) will hold a secret hearing next week into the apparent manipulation by BigPharma of the World Health Organization's (WHO) global H1N1 flu campaign.

Doctors Poisoned by Medical-Media Monopoly  
by Dr. Len Horowitz, Rense.com  

January 16, 2010

European Council officials investigating vaccine industry corruption and media frights that prompted governments worldwide to over-stock risky H1N1 vaccines and expensive drugs for the unusually mild "2009 swine flu pandemic" have a Special Report on-line in Medical Veritas to consider.

Vast corruption of medicine is ad-health science publications according to the authors who indict The Lancet--an esteemed medical journal--and other Reed-Elsevier periodicals for gross conflicting interests.

More than half the experts fighting the 'pandemic' have ties to drug firms
By Fiona Macrae and Sophie Borland,  
MailOnline  
January 14, 2010

More than half the scientists on the swine flu taskforce advising the Government have ties to drug companies.

Many have declared interests in Glaxo-SmithKline, the vaccine maker expected to be the biggest beneficiary of the pandemic.

You've heard it before, how the pharmaceutical industry has a giant "revolving door" through which corporations and government agencies frequently exchange key employees.

That reality was driven home in a huge way today when news broke that Dr. Julie Gerberding, who headed the CDC from 2002 through 2009, landed a top job with Merck, one of the largest drug companies in the world. Her job there? She's the new president of the vaccine division.

Advisers on Vaccines Often Have Conflicts, Report Says
by Gardner Harris, New York Times
December 18, 2010

A new report finds that the Centers for Disease Control did a poor job of screening medical experts for financial conflicts when it hired them to advise the agency on vaccine safety, officials said Thursday.

Most of the experts who served on advisory panels in 2007 to evaluate vaccines for flu and cervical cancer had potential conflicts that were never resolved, the report said. Some were [even] legally barred from considering the issues but did so anyway.

Federal agencies continue to deceive Americans
by Richard Gale and Dr. Gary Null, GlobalResearch.CA
11-13-09

For our government health officials at the Centers for Disease Control (CDC) and the Department of Health and Human Services (HHS), vaccines have been baptized safe and, therefore, there is no reason for further debate.

When put to the test, a meticulous review of the scientific literature finds that virtually all of the Federal health agencies assumptions are held in error.

Furthermore, we are shocked that the CDC, FDA and HHS, with all of their resources, refuse to take into consideration the large body of clinical evidence that contradicts their biased vaccine policies. Our review of the scientific literature is at two levels. First, there is a direct relationship between vaccination and Autism Spectrum Disorders (ASD). This evidence, as we shall see, was taken under oath during a three year Congressional investigation, which clearly shows that Federal health officials were complicit in covering up the associations between vaccines and neurological damage.

Time for CDC to Come Clean
Robert Kennedy, Jr, Huffington Post
March 1, 2006

Correspondence newly obtained under the Freedom of Information Act raises troubling new questions about CDC's role in the Thimerosal scandal. Thimerosal is the mercury-based vaccine preservative that has been linked to epidemics of neurological disorders, including autism, in American children born after 1989.

Responding to scientific studies linking dangerous levels of mercury to a range of health disorders, the CDC in July 1999 recommended that the nation's vaccine makers eliminate Thimerosal as a pre-servative, "as soon as possible."
