

BIG PHARMA EXPOSED

HONORABLE SCIENTISTS AND RESEARCHERS HAVE BEEN WARNING US ABOUT BIG PHARMA . . . FOR DECADES!!

Big Pharma is one of the largest and most profitable industries in the world. Their ability to buy influence over medical schools, government, policy makers and the media is essentially unlimited! Because Big Pharma spends millions lobbying and advertising, most people are unaware of this ongoing threat to our health and well being. Here are but a few examples of critically important exposés by medical experts and insiders that Big Pharma's gatekeepers have kept from us.

Much of what medical researchers conclude in their studies is misleading, exaggerated, or flat-out wrong. So why are doctors—to a striking extent—still drawing upon misinformation in their everyday practice? **Dr. John Ioannidis** has spent his career challenging his peers by exposing their bad science. In 2005 he published *Why Most Published Research Findings are False* in the PLoS MEDICINE journal.

Internist **Suzanne Humphries, MD** of the International Medical Council on Vaccination, explains how she was deceived during her medical education and how she discovered the truth about vaccines in this excellent video on youtube: [Suzanne Humphries on Vaccines](#) Dr. Humphries co-authored the book, *Dissolving Illusions: Disease, Vaccines and the Forgotten History*.

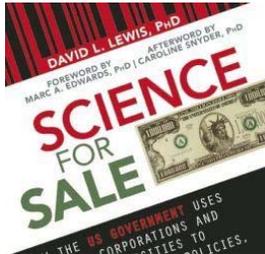

A top physician who used to work for drug giant Merck & Co., creator of the Gardasil vaccine for cervical cancer, has made some groundbreaking public admissions. During an interview with the French magazine *Principes de Sante*, **Dr. Bernard Dalbergue** confessed that Gardasil is a worthless vaccine that not only fails to protect against cervical cancer but also puts individuals at risk of paralysis, encephalitis, Guillain-Barre syndrome and a host of other debilitating ailments.

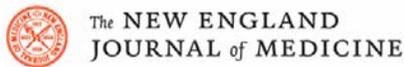

The researchers of this monumentally important **2013 Harvard study**, *Institutional Corruption of Pharmaceuticals and the Myth of Safe and Effective Drugs*, warned that meeting the needs of the drug companies has taken priority over meeting the needs of the patients; adding that unless this corruption of regulatory intent is reversed, the situation will continue to deteriorate.

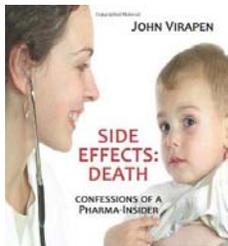

An extraordinary paper, *The Health Hazards of Disease Prevention*, by a courageous doctor and investigative medical researcher, **Dr. Lucija Tomljenovic**, was presented to the British Society for Ecological Medicine in March 2011. It exposed the dirt on 30 years of secret official transcripts of meetings of UK government vaccine committees and the supposedly independent medical “experts” sitting on them with their drug industry connections.

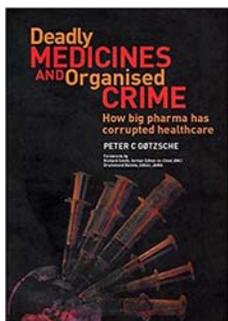

Dr David Lewis, former EPA/CDC scientist, exposed the fall of so-called government agencies to abject cronyism and corruption, knowingly putting the lives of millions of Americans in jeopardy, in his brilliant book *Science for Sale*. During his career Dr. Lewis was employed by private corporations, universities and government agencies. He discovered that all three institutions have been corrupted and have been producing the scientific results their funders pay them to produce.

Author and former editor of the New England Journal of Medicine, **Dr. Marcia Angell**, wrote *The Truth About the Drug Companies* in 2005. “It is simply no longer possible to believe much of the clinical research that is published, or to rely on the judgment of trusted physicians or authoritative medical guidelines. I take no pleasure in this conclusion, which I reached slowly and reluctantly over my two decades as an editor of the New England Journal of Medicine.”

Former Big Pharma insider, **John Virapen**, blew the whistle on Big Pharma in his book *Side Effects: Death*. He exposed that pharmaceutical companies want to keep people sick. They want to make others think that they are sick. And they do this for one reason: money. More than 75 percent of leading scientists in the field of medicine are “paid for” by the pharmaceutical industry. Pharmaceutical companies increasingly target children with vaccines and unwarranted dangerous behavioral medications.

In his book **Dr. Peter Götzsche**, co-founder of the Cochrane Collaboration, exposes the fact that pharmaceutical drugs are the third leading cause of death in America after heart disease and cancer. "The main reason we take so many drugs is that drug companies don't sell drugs, they sell lies about drugs. This is what makes drugs so different from anything else in life. Virtually everything we know about drugs is what the companies have chosen to tell us and our doctors. The reason patients trust their medicine is that they extrapolate the trust they have in their doctors into the medicines they prescribe. The patients don't realise that, although their doctors may know a lot about disease and human physiology . . . they know very very little about drugs that hasn't been carefully concocted and dressed up by the drug industry."
