

Institutional Corruption of Pharmaceuticals and the Myth of Safe and Effective Drugs

The researchers of this monumentally important 2013 Harvard study, *Institutional Corruption of Pharmaceuticals and the Myth of Safe and Effective Drugs*, warned that meeting the needs of the drug companies has taken priority over meeting the needs of the patients; adding that unless this corruption of regulatory intent is reversed, the situation will continue to deteriorate.

Gardasil will be the Biggest Scandal in Medical History

In 2014 a top physician who used to work for drug giant Merck & Co., creator of the Gardasil vaccine for cervical cancer, made some groundbreaking public admissions. During an interview with the French magazine *Principes de Sante*, Dr. Bernard Dalbergue confessed that Gardasil is a worthless vaccine that not only fails to protect against cervical cancer but also puts individuals at risk of paralysis, encephalitis, Guillain-Barre syndrome and a host of other debilitating ailments.

Offline: What is medicine's 5 sigma?

Dr. Richard Horton, Editor-in-chief of Britain's oldest and most prestigious medical journal *The Lancet*, revealed in his April, 2015 commentary that: "The case against science is straightforward: much of the scientific literature, perhaps half, may simply be untrue. Afflicted by studies with small sample sizes, tiny effects, invalid exploratory analyses, and flagrant conflicts of interest . . . science has taken a turn towards darkness."

SUGGESTED SOLUTION

To learn the truth about all of the medications that are prescribed for you go to Drugs.com and click on "Side Effects" - then scroll down and read the info provided "For Healthcare Professionals". While your doctor might believe the benefits generally outweigh the risks, don't forget that it is the patient taking all of the risks, **not the doctor**. Should you decide not to consent to a treatment or medication once you have fully informed yourself, it would be helpful to give your doctor a signed reminder that it is within your right to do so. This can be done by:

1. going to AntiCorruptionSociety.com
2. clicking on the "Source Documents" tab
3. scrolling down to and click on the "Declaration of Patients Rights"
4. printing out both the front and back pages of the declaration
5. filling in your name and signing it
6. presenting it to your physician

BIG PHARMA AND PHYSICIANS

HONORABLE SCIENTISTS AND RESEARCHERS HAVE BEEN WARNING US ABOUT BIG PHARMA . . . FOR MORE THAN A DECADE!

Big Pharma is one of the largest and most profitable industries in the world. Their ability to 'buy influence' over medical schools, government, policy makers and the media is essentially unlimited! Because Big Pharma spends millions lobbying and advertising, most people are unaware of this ongoing tragedy and threat to our health and well being. Here are but a few examples of critically important exposés by medical experts and insiders that Big Pharma's gatekeepers have done their best to keep from both physicians and patients alike.

BOOKS

Overdo\$ed America

Using the examples of Vioxx, Celebrex, cholesterol-lowering statin drugs and antidepressants, Dr. John Abramson, M.D. showed in 2004 that at the heart of the current crisis in American medicine lies the commercialization of medical knowledge itself. Drawing on his background in statistics, epidemiology, and health policy, he exposed how drug companies misrepresent statistical evidence, mislead doctors and compromise our health.

The Truth About the Drug Companies

Author and former editor of the *New England Journal of Medicine*, Dr. Marcia Angell, wrote in her book in 2005: "It is simply no longer possible to believe much of the clinical research that is published, or to rely on the judgment of trusted physicians or authoritative medical guidelines. I take no pleasure in this

conclusion, which I reached slowly and reluctantly over my two decades as an editor of the New England Journal of Medicine.” – Dr. Marcia Angell.

Confessions of an Rx Drug Pusher

Author Gwen Olsen spent more than a decade as a sales rep in the pharmaceutical industry working for health care giants such as Johnson & Johnson, Bristol-Myers Squibb and Abbott Laboratories. This book (released in 2005) is her poignant autobiographical journey through the darkness of mental illness and the catastrophic consequences that lurk in medicine cabinets around the country. She offers an extremely honest glimpse into alarming statistics of a health care system that is ranked last among nineteen industrialized nations worldwide. As a former sales rep, Olsen learned firsthand how an unprecedented number of lethal drugs are unleashed into the United States market.

The Whistleblower: Confessions of a Healthcare Hitman

Dr. Peter Rost, MD, a former vice president of one of the largest pharmaceutical companies in the world (Pfizer), shared the truth about the ties between the medical and pharmaceutical industry in 2006. Rost is a whistleblower of the entire pharmaceutical industry in general. Considering his work experience, it would be an understatement to say that he is an expert on big pharma marketing and deception.

Side Effects: Death

In 2010 former Big Pharma insider, John Virapen, blew the whistle on Big Pharma in his book *Side Effects: Death*. He exposed that pharmaceutical companies want to keep people sick. They want to make others think that they are sick. And they do this for one reason: money. More than 75 percent of leading scientists in the field of medicine are “paid for” by the pharmaceutical industry. Pharmaceutical companies increasingly target children.

How Statin Drugs Really Lower Cholesterol - and kill you one cell at a time

Dr. Hannah Yoseph, MD. and James Yoseph's stunning expose, in plain language, revealed in 2012 the science, the corruption and the enormous conspiracy it took to bring statins to market. The FDA shirked its duty. They demonstrated that neither safety nor efficacy has been proven for statins.

Bad Pharma - How Drug Companies Mislead Doctors and Harm Patients

Dr. Ben Goldacre, MD revealed in 2012 through scrupulous research that while we like to imagine that the development of new medicines is a scientific and impartial endeavor, in reality pharmaceutical companies often produce useless or even harmful drugs, tested in flawed trials and approved by regulators who have been deliberately misinformed.

Dissolving Delusions

Internist Suzanne Humphries, MD details facts and figures from long-overlooked medical journals, books, newspapers, and other sources in 2013.

Using myth-shattering graphs, this book shows that vaccines, antibiotics, and other medical interventions are not responsible for the increase in lifespan and the decline in mortality from infectious diseases. If the medical profession could systematically misinterpret and ignore key historical information, the question must be asked, “What else is ignored and misinterpreted today?” Perhaps the best reason to know our history is so that the worst parts are never repeated.

Deadly Medicine and Organized Crime

Dr. Peter Gøtzsche, co-founder of the prestigious Cochrane Collaboration, exposes the extensive and dangerous corruption of the field of medicine by the pharmaceutical industry. In his 2013 book he explains that "The main reason we take so many drugs is that drug companies don't sell drugs, they sell lies about drugs. Virtually everything we know about drugs is what the companies have chosen to tell us and our doctors . . . the reasons patients trust their medicine is that they extrapolate the trust they have in their doctors into the medicines they prescribe. The patients don't realise that, although their doctors may know a lot about diseases . . . they know very, very little about drugs that hasn't been carefully concocted and dressed up by the drug industry. "

Science for Sale

Dr David Lewis, former EPA/CDC scientist, exposed the fall of so-called government agencies to abject cronyism and corruption, knowingly putting the lives of millions of Americans in jeopardy, in his brilliant book *Science for Sale* (2014). During his career Dr. Lewis was employed by private corporations, universities and government agencies. He discovered that all three institutions have been corrupted and have been producing the scientific results their funders pay them to produce.

ARTICLES, REPORTS AND WHITE PAPERS

Why Most Published Research Findings are False

Much of what medical researchers conclude in their studies is misleading, exaggerated, or flat-out wrong. So why are doctors—to a striking extent—still drawing upon misinformation in their everyday practice? Dr. John Ioannidis has spent his career challenging his peers by exposing their bad science. In 2005 he published *Why Most Published Research Findings are False* in the PLoS MEDICINE journal.

The Health Hazards of Disease Prevention

This extraordinary paper by a courageous doctor and investigative medical researcher, Dr. Lucija Tomljenovic, was presented to the British Society for Ecological Medicine in March 2011. It exposed the dirt on 30 years of secret official transcripts of meetings of UK government vaccine committees and the supposedly independent medical “experts” sitting on them with their drug industry connections.
